*The publication is easy in read better to understand. It is writter in basic words and phrases rather than hard to understand. You wont truly feel monotony at anytime of your respective time (that's what catalogues are for about if you question me).*

## MECHANISMS OF CELL-MEDIATED CYTOTOXICITY

Book Condition: New. Publisher/Verlag: Springer, Berlin | The First International Workshop on Mechanisms in Cell-Mediated Cytotoxicity was held at Carry-le-Rouet, France, September 14-16, 1981. The Workshop brought together for the first time leading investigators in each of the principal areas of cell-mediated cytotoxicity, as well as experts in the area of complement-mediated cytotoxicity. Formal research presentations were held to a minimum, the emphasis being on open discussion of current knowledge about mechanisms of cytotoxicity in each of the systems under consideration. The major objectives of the Workshop were 1) to compare and integrate what is known about the mechanism(s) of cytotoxicity in each system; 2) to determine whether, on the basis of information in hand, it seems likely that the mechanisms of cytotoxicity in the various systems are the same or are unique; and 3) to stimulate thinking about new approaches to elucidating the fundamental mechanisms by which certain cells are able to kill other cells. | Section I.
