SIGNAL PROCESSING AND APPLICATION OF EXPERIMENTAL MATH TUTORIALS AND EXERCISES TO ANSWER

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 144 Publisher: Beijing University of Posts and Telecommunications Press Pub. Date :2009-10. This book is a digital signal processing and application. a book supporting experiments materials. with the Digital Signal Processing and Applications chapter of the teaching. arranged for the corresponding experiments. Include: matlab entry and common signal generation and display; differential equations discrete systems and discrete convolution sequence analysis of discrete signals and systems. z-transform analysis; periodic signal and discrete Fourier series of finite length sequences Discrete Fourier transform (dft); fast Fourier transform (fft) algorithm; digital filter design and implementation. Finally. the book gives the reference on the machine operating procedures and digital signal processing and application. a book to answer each chapter exercises. Digital Signal Processing is a very practical course. the book with the basic theory of digital signal processing design the corresponding experiments. which to learn and master the digital signal processing technology has important theoretical and practical significance. Contents: Part 1 digital signal processing-based experiment experiment 1 matlab entry and common signal generation and display of experiment 2. the sequence of discrete convolution and the system is poor Four Satisfaction guaranteed, or money back.
